E info@adventure4wd.com.au, W adventure4wd.com.au, ABN 60 117 101 152, ACN 076 353

Energy & Infrastructure Off-Road 4WD – 1 Day Duration

A 4WD program that is primarily about the off-road challenges seen on the trail and is suited to staff using 4WD vehicles in tricky terrain, but in areas where help is at close hand and the risk exposure is low. Ideally this is suited to drivers who might be new or have a novice understanding of 4WD.

With an informative and fundamental theory session at day's commencement followed by a quick mechanical awareness check, it's off to the practical training grounds to gain an understanding of the use of HIGH and LOW range, throttle control, vehicle placement and how to avoid getting stuck and what to do if you're unlucky enough to be caught by the terrain.

You'll marvel at just how quickly you develop your skills, a steady progression that builds lots of confidence in yourself and also the vehicle. You'll get plenty of reminders about the need to be safe and the techniques learnt will also keep you productive.

Courses are scheduled regularly or on demand and can be tailored to suit your requirements. You'll be assessed on two levels, via your practical skills demonstrated on the day and a post-course theory assessment.

The program is fully transportable. Ask us about how we can assist you at your site, anywhere in South Australia (minimum numbers may apply).

- **Learn all about the featured off-road technologies of your vehicle – 4WD HIGH/LOW, LSD, ETC**
- **Discover the risks associated with driving on less than perfect surfaces**
